Latest Insider Feed UWP APK: 7.2 MB : SU is the size of this APK file (Uploaded By : ApkdI Apk) 1.1 version of the app : SU is the size of this APK file (Uploaded By : ApkdI Apk) AppLock uses hardware-backed AES encryption and strong security hardware to encrypt and securely store your data on your phone. If your phone is lost or stolen, or you are exchanging your phone or tablet for a new model, you can securely wipe your data. The best part is that you don't need to pay a data center to do this for you. When you use AppLock, we securely move all your data to the cloud, then encrypt and securely store your data on your phone. The data is sent over the Internet securely using AES-256 encryption. The data will be deleted automatically after a certain amount of time or if you delete the data yourself from the device. Not only does AppLock secure and transfer your data, it also guarantees your data will not be accessible from your locked screen. AppLock is the only solution that can truly provide a secure Android device, one that can be owned by anyone - a parent, friend, or teen. You can share AppLock with your children or prevent them from accessing your private files, photos, and apps. App

What's New In?
